

California Closets 1ST

The client wanted to convert a spare bedroom into her dream closet, and wanted a level of sophistication that would inspire her fashion sense. The use of symmetry, color, texture, and lighting give a timeless look to the finished design. The lighting reflects from the mirrors, decorative wallpapered ceiling, and focal areas of the room. Velvet-lined tack boards are inside the doors of the island, and are perfect for inspirational pictures and fashionable jewelry. The client's dream closet is now also an elegant dressing room.
