

AguaFina Gardens | 1ST
International

This garden is truly best enjoyed at night. Taking advantage of the reflective nature of the pool, lighting the large columns of the Corten steel fountain creates a splendid vision. A combination of underwater and surface lights highlight the water flowing from three different spillways, resulting in glimmering shadows. Beyond the fountain, the details and textures of a hand-stacked stone wall are dramatic, while underwater lighting in the formal pool in the front garden gives the illusion that the steps are floating. Up-lighting the courtyard trees helps define the landscape.

Judge's Insights

The AguaFina Gardens project is very moody. I love it!"

— Judge Meg Lonergan
