Exquisite architectural detailing, cohesively integrated throughout the bedroom and bathroom, is executed with an artful simplicity in this master suite. The spaces are a study of textures, patterns, and patinas united by a monochromatic color palette of soothing beachy grays, punctuated with crisp, white trim and a whisper of coastal blue. In the bathroom, a sculptural free-standing bathtub is set in an alcove, centered under double-mulled cottage-style double-hung windows and transom lights. The tub is surrounded by walls of rough-cut limestone and exudes a romantic, fairytale ambience.
